ReactJS	NextJS
Vue	Nuxt
Adaptability	Attention to detail
Time management	TailwindCSS
Microsoft Teams/Office	

PROJECTS

Countries App

Created with Vue 3, Nuxt 3, and styled with TailwindCSS. This application uses restcountries API to show every country and provide notable information such as population, currencies, languages, etc.

🔗 https://countries-nuxt.vercel.app/

Lift Tracker

Created using NextJS, this application allows the user to create a workout session comprised of any number of exercises. These sessions include information such as the intended weight, amount of reps, and amount of sets. They can then be opened and viewed as a an active workout to keep track of what has been completed while exercising.

Personal Website

My personal portfolio website created using NextJS and hosted on Vercel. It displays projects I have worked on and provides social links to connect with me.
